CLAIM AMENDMENTS

1. (Currently Amended) A method comprising:

enabling a processor-based system to difference a cached version and a current version of an Internet web page, said current version being provided <u>to a web browser on the processor-based system</u> ~~directly by~~ <u>from</u> a web server <u>for the web page</u>;

enabling the system to indicate the difference between said cached and current versions; and

providing a graphical user interface of a navigation bar <u>on a browser window</u> with a subtract button image.

2. (Original)The method of claim 1 wherein indicating includes causing the difference between said cached and current version to be displayed.

3. (Original) The method of claim 2 wherein indicating the difference includes blanking the common material between the cached and current versions.

4. (Original) The method of claim 1 wherein causing a processor-based system to difference the cached version and the current version includes providing a user selectable graphical button image and enabling the user to select the button image to cause a processor-based system to difference a cached version and a current version.

5. (Canceled)

6. (Previously Presented) The method of claim 1 including enabling the system to difference a cached version and a current version when the button image is mouse clicked on.

7. (Original) The method of claim 1 further including enabling the user to toggle between indicating the difference between said cached and current versions and indicating the current version.

8.   (Currently Amended) An article comprising a medium for storing instructions that enable a processor-based system to:

difference a cached version and a current version of an Internet web page, said Internet web page being provided ~~to a browser from~~ directly by a web site for the web page server;

indicate the difference between said cached and current versions; and

provide a graphical user interface of a navigation bar with a subtract button image.

9.   (Original) The article of claim 8 further storing instructions that cause a processor-based system to cause the difference between said cached and current versions to be displayed.

10.   (Original) The article of claim 9 further storing instructions that cause a processor-based system to blank the common material between the cached and current versions.

11.   (Original) The article of claim 8 further storing instructions that cause a processor-based system to provide a user selectable graphical button image and enable the user to select the button image to cause a processor-based system to difference a cached version and a current version.

12.   (Canceled)

13.   (Previously Amended) The article of claim 8 further storing instructions that enable a processor-based system to difference a cached version and a current version when the button image is mouse clicked on.

14.   (Original) The article of claim 8 further storing instructions that cause a processor-based system to enable the user to toggle between indicating the difference between said cached and current versions and indicating the current version.

15. (Currently Amended) A system comprising:

a processor;

a storage coupled to said processor; and

said storage storing instructions that enable the processor-based system to difference a cached and a most current version of an Internet web page, said most current version being ~~immediately~~ received by a browser on said system from a web site for the web page ~~server~~, indicate the difference between said cached and most current versions, and provide a graphical user interface of a navigation bar with a subtract button image.

16. (Original) The system of claim 15 wherein said storage stores instructions for causing a button image to appear in a browser window which when clicked on automatically causes the cached version and the current version of an Internet web page to be differenced.

17. (Original) The system of claim 16 including a display coupled to said processor, said storage storing instructions that cause the difference between said cached and current version to be displayed on said display.

18. (Original) The system of claim 16 wherein said image may be mouse clicked on to select a feature associated with said image.

19. (Original) The system of claim 17 wherein said storage stores instructions that cause a processor-based system to enable the use to toggle between indicating the difference between said cached and current versions and indicating the current version.

20. (Original) The system of claim 15 wherein said storage stores instructions that cause the processor to enable the user to select a button image to cause a processor-based system to difference the cached and current versions.

21-23 (Canceled)

24. (New) A method comprising:

enabling a processor-based system to difference a cached version and a current version of an Internet web page, said current version being provided directly from a web site for the web page; and

indicating the difference between said cached and current versions by blanking the common material between the cached and the current versions such that only new material in the current version is displayed.

25. (New) An article comprising a medium storing an instruction that enables a processor-based system to:

difference a cached version and a most current version of an Internet web page available on a web site for the web page; and

indicate the difference between said cached and most current versions by blanking the common material between the cached and the current versions such that only new material in the current version is displayed.

26. (New) A system comprising:

a processor;

a storage coupled to said processor; and

said storage storing instructions that enable the processor to difference a cached and a current version of an Internet web page, said current version being provided directly from a web site for the web page, and indicate the difference between said cached and current versions by blanking the common material between the cached and current versions such that only new material in the current version is displayed.
